Selected key topics from Paper 1 and Paper 2 Higher Level Maths comprehensively covered. Problems/Examples are structured systematically in the book at four levels of difficulty.

Profile of the Lecturer

We are delighted to include the services of a highly accomplished teacher of Higher Level Maths, Mark Campion who has twenty years dedication to building his students potential in Maths.

Mark is keen to draw together all the different aspects of the Higher Level Maths course including the challenge of complex problems and the manner in which the various topics are interlinked. He gives his students the essential key to success – self-belief. **CREATIVE**

Mark believes in building students' confidence to attain excellence at Higher Level Maths. Over the years, his Higher Level Maths students have been won over by his sharp intellect, his unique, highly appealing teaching methods and his intense focus on important key topics.
